

Working at Heights Training

Prepare your students for a future in construction trades

Why this training matters

Falls from height are one of the biggest causes of workplace injuries and deaths in Australia. But with the right training and safety systems, most are completely preventable.

Your students will gain an intimate understanding and knowledge of the WHS legislation and safety requirements for this high risk work.

Who this training is for

This course is ideal for students who wish to pursue a career in the construction trades, particularly those who will work at heights as part of their job, including scaffolders, roofers, carpenters, painters, and maintenance workers.

What we provide

Everthought delivers RIIWHS204E - Work Safely at Heights, a nationally recognised course designed for real-world construction sites.

What your students will learn

- How to spot height-related hazards
- How to use fall prevention equipment correctly
- Safe work procedures and emergency response
- How to follow rescue procedures if something goes wrong

Course code

RIIWHS204E

Duration

1 day
